

TELEMEDIA KENYA LTD

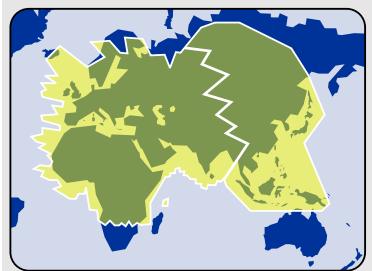

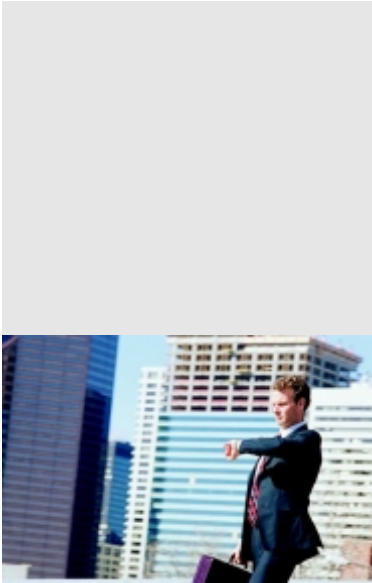

THURAYA SERVICE PROVIDER

Seamless connectivity

Freedom of movement

Introduction

Telemedia Kenya Ltd. (TKL) was established in March 2004 for the sole purpose of servicing the Thuraya telephony market in Kenya and the greater East African region. In May 2004 TKL was awarded the first Global Mobile Personal Communications via Satellite (GMPCS) License by the Communications Commission of Kenya.

Telemedia Kenya Limited (TKL) is committed to bringing affordable and world renowned Thuraya technology to Africa and its most remote locations. With a well motivated and dedicated team of professionals, TKL is proud to market and support Thuraya Products and Services all through the coverage footprint, making communications a reality for all.

Telemedia Kenya Ltd the Place and People

TKL's offices are located at the ultra modern Nairobi Business Park near the Ngong Race Course in Nairobi. The offices were officially opened by Mr. Yusuf Abdulla Al Sayed CEO Thuraya

TKL is directly connected to the Thuraya network and database, this allows TKL to provide unmatched speed in service delivery and response time to any queries.

Our mission is to be the provider of high value, high quality, and convergent Thuraya solutions to subscribers worldwide. These scalable solutions will have unparalleled support to ensure flexibility and to meet and exceed customer expectations.

Being the local Thuraya service provider for Thuraya in this region allows us to have our own Thuraya Prefix (882164333.....) this ensures that our sim cards offer the best outgoing call rates on the Thuraya satellite network from Africa.

TKL has an in house Billing and Administration department that looks after all Thuraya billing issues as well as management of the sim cards, for activations, renewals deactivations and suspensions in case of loss.

Customer focus in TKL's business strategy is also evidenced by the fact that we are able to offer training to users as well as design customised communication solutions for our clients.

The Product

Thuraya satellite phone gives you the freedom of movement and the ability to stay connected anywhere in Europe, North & Central Africa, the Middle East, the CIS countries and South Asia. Roaming onto GSM networks and seamless connectivity from border to border in over 110 countries.

Dynamic Technology

Thuraya phones combine 3 powerful technologies, **satellite, GSM and GPS**. The Phone can switch from satellite to GSM and visa versa dependant on your choice and availability of either network. GPS is a valuable tool for personal navigation as well as safety, it may also be used for advanced fleet management.

Size does matter

Satellite phones have long been encumbered by size and weight. The Thuraya phones are compact, designed for shirt pocket fit and hand grip comfort. Sleek in design, elegant in proportion and easy to operate.

Thuraya **DSL**

Thuraya**DSL** satellite IP modem offers "always on" high-speed GPRS packet data communication of up to 144 Kbps via Thuraya satellite - go online for as long as you like, anytime, anywhere in Thuraya's coverage area of more than 110 countries in Europe, North and Central Africa, large parts of Southern Africa, the Middle East, Central and South Asia.

Product Applications

Relief and Humanitarian services

Whilst operating in remote and often dangerous areas, communications is not just a luxury it is a necessity. Thuraya's satellite foot print covers over 110 countries, and provides seamless connectivity from North & Central Africa and Large portions of Sub Saharan Africa, as well as Europe, Middle East, Central and South Asia. Thuraya gives you cost effective, easy to use and reliable communications from these regions.

Exploration, Mining, Oil and Gas

Thuraya's dual mode GSM & Satellite technology allows users to communicate via Voice as well as Data on satellite mode whilst at remote sites and on GSM mode while they are at city suburbs. Thuraya allows workers to remain in constant touch with the head offices as well as their families,

Corporate and institutional use

Competitive long distance calling charges, and extensive coverage area over regions that are poorly served by conventional communication services make Thuraya the ideal choice for organisations and institutions. Indoor Accessories such as the Fixed Docking adapter enable the Thuraya to be used on satellite mode whilst inside an office. Convenience of satellite technology from the comfort of your office.

Marine Life

Thuraya's satellite services allow communications to transcend land boundaries offering seamless telecommunications across oceans and seas within the Thuraya coverage area. Crew calling options address the need for vessel owners to provide both official and personal communications from a single phone. Enjoy uninterrupted satellite services in the entire coverage area including the Red Sea, the Mediterranean Sea, the Arabian Sea, the North Sea, the Baltic Sea, the Caspian Sea, the Black Sea and part of the Indian Ocean.

Adventure and leisure

Thuraya ensures that you are secure and reachable in the event of an emergency whilst having fun anywhere in the coverage area. People who venture beyond the reach of terrestrial fixed and cellular telecommunications such as mountaineers, climbers and campers can remain in touch with the rest of the world. Go further and still remain in touch through your Thuraya phone.
