Operations Update

Logistics Cluster Syria Response

Whole of Syria Response

- Syria      
- Turkey    + transshipment services
- Jordan    + transshipment services

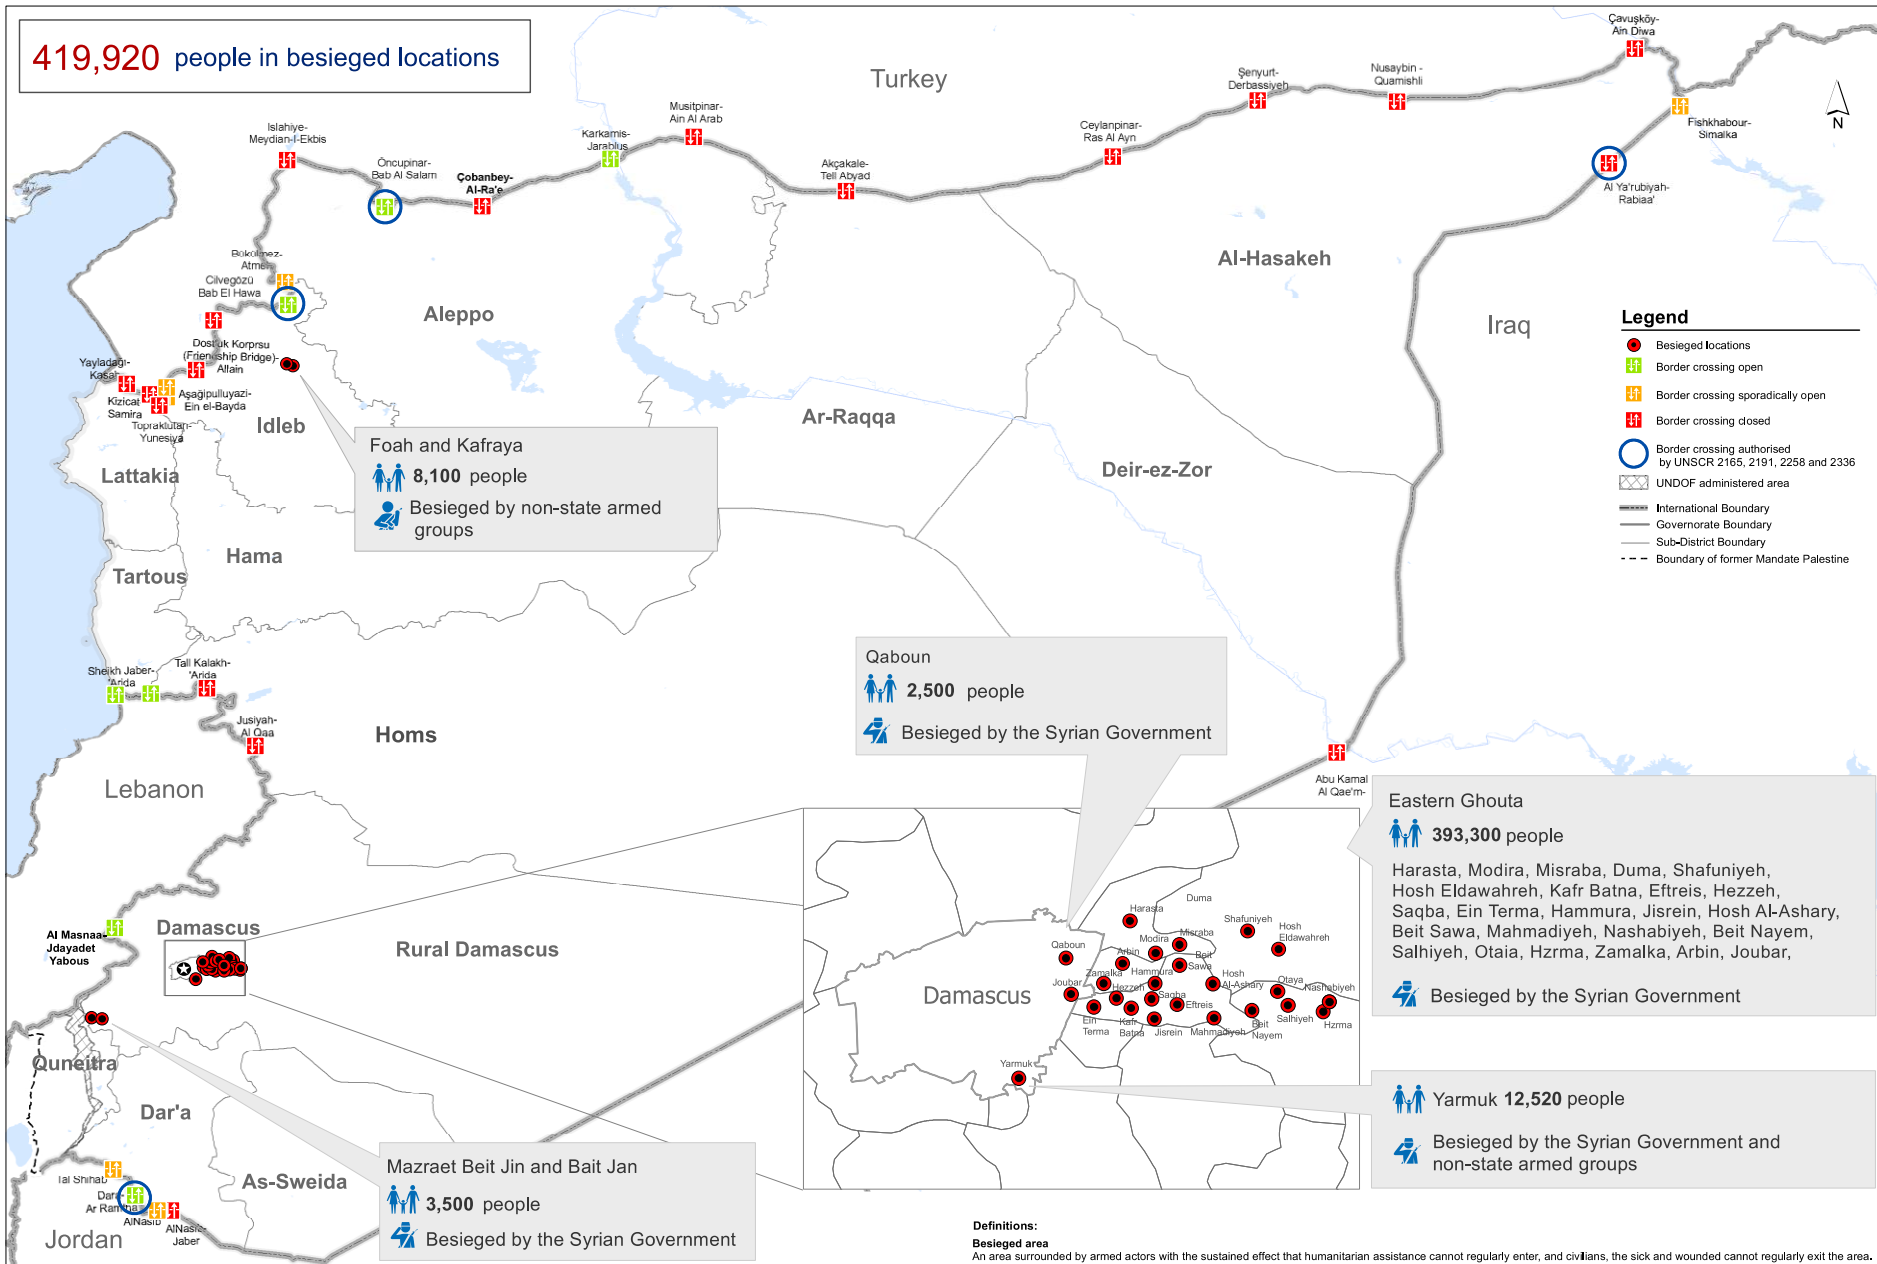

Response from within Syria

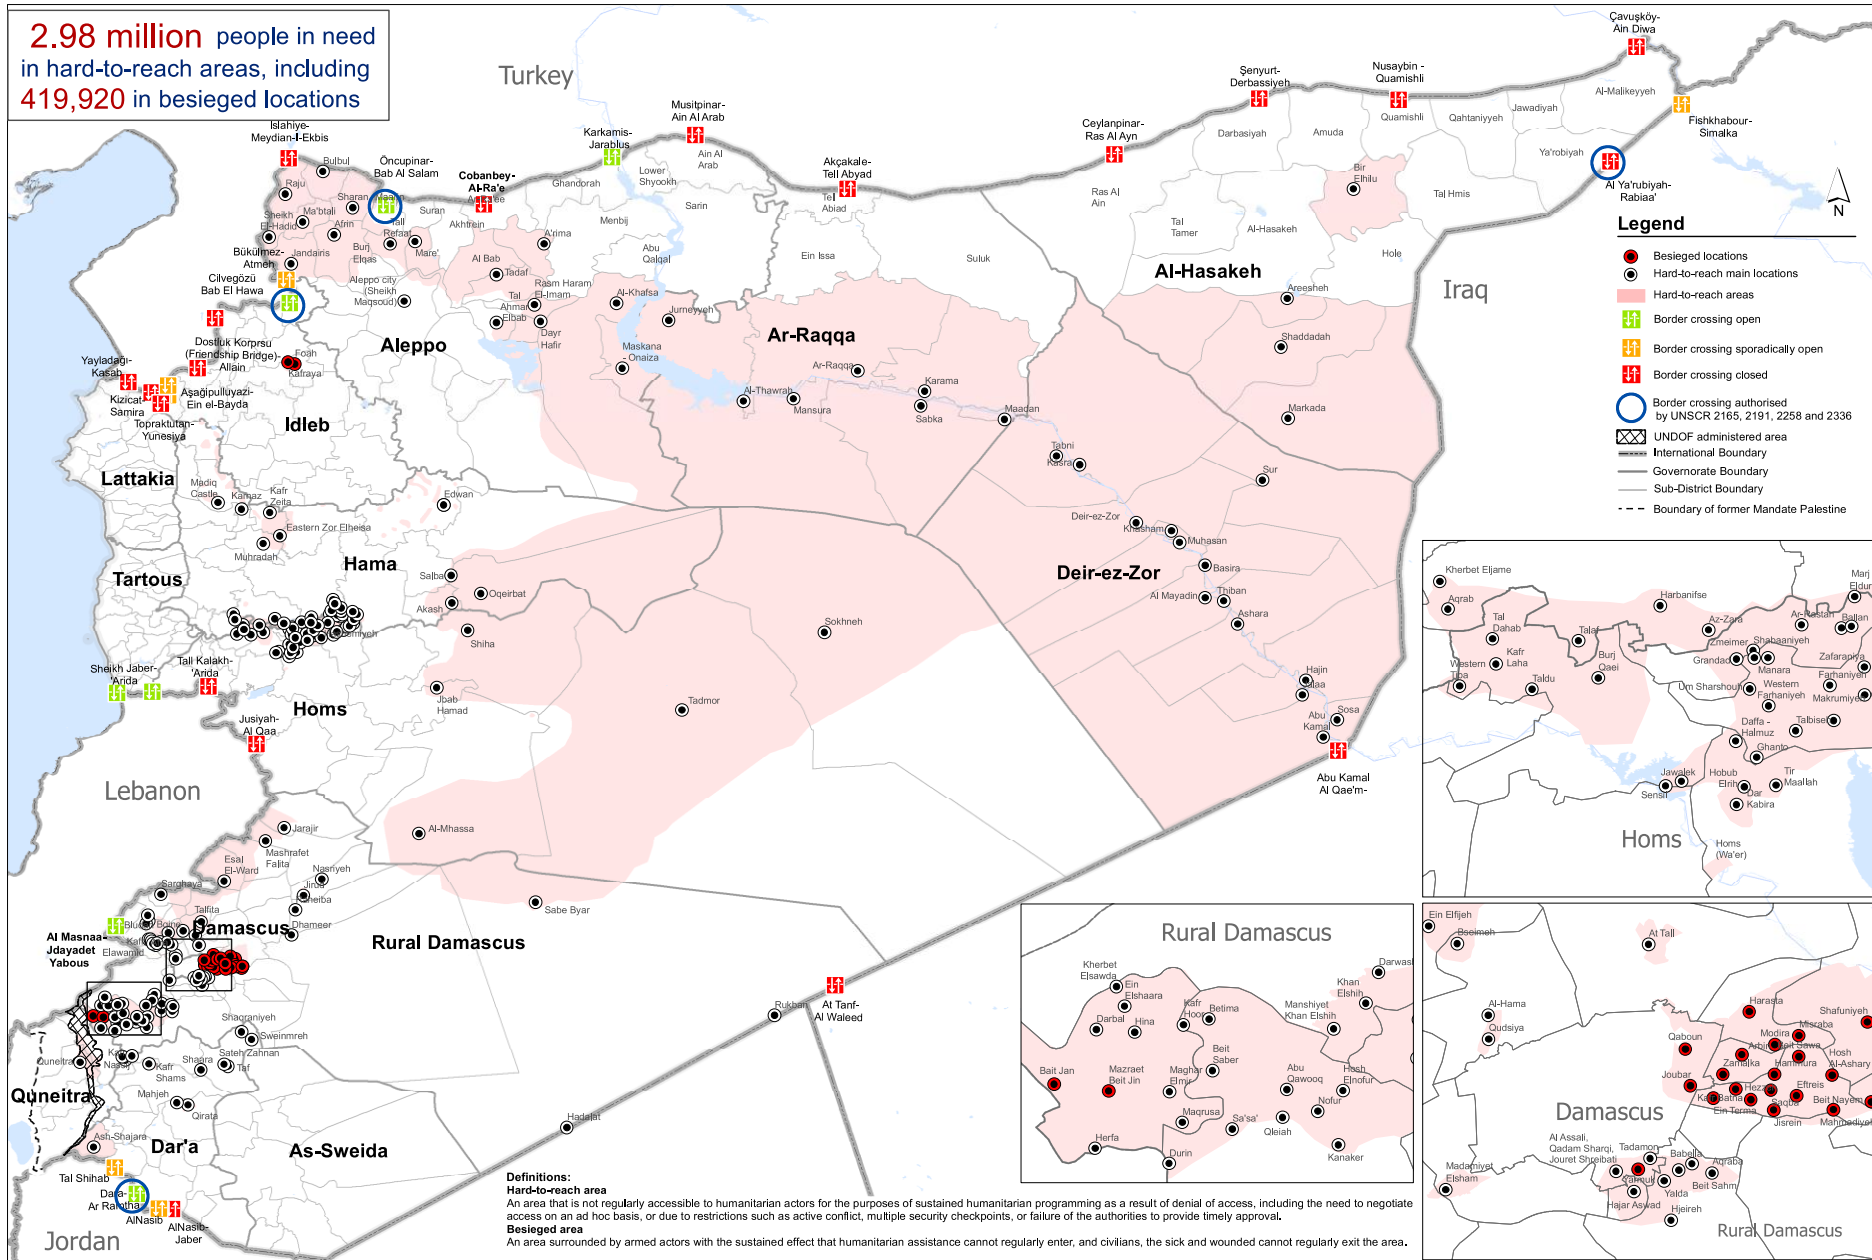

- Coordination and information management
- Inter-agency humanitarian convoys to hard-to-reach and besieged areas jointly with SARC, ICRC, and UN organizations from Damascus, Homs, and Aleppo hubs.
- Emergency airlift from Damascus to Qamishli (currently phased out)
- Common storage in Damascus, Homs, Lattakia, Tartous, Aleppo, and Qamishli
- Fuel for winterization activities
- Capacity building through trainings and purchase of equipment

419,920 people in besieged locations

2.98 million people in need
in hard-to-reach areas, including
419,920 in besieged locations

Inter-Agency Convoys

Turkey & Jordan Cross-Border Operation

- Coordination and information management
- Transshipment services at Bab-al Hawa and Bab-al-Salama hubs from Turkey
- Transshipment and transport services at Ramtha hub from Jordan
- Capacity building through trainings and purchase of equipment

Turkey Cross-Border Operation

Jordan Cross-Border Operation

Summary of 2017 activities as of 31 Oct

Inter-Agency Humanitarian Convoys	48
Damascus-Qamishli Airlifts	285 flights / total of 23,770 m ³ /on behalf of 9 organizations
Storage capacity across Syria	6 locations / total of 16,429 m ²
Cargo stored	16,920 CBM
No. of trucks transhipped through Ramtha	1001
No. of trucks transhipped through Bab-al-Hawa	3061
No. of trucks transhipped through Bab-al-Salama	688
Number of trainings organized	9
Staff trained	188
Trucks donated to SARC	16 (10 more expected by end of 2017)

BUDGET

- 2017 HRP budget: \$16,498,740
 - WFP \$12,228,740
 - IOM \$4,270,000
- 2018 HRP budget: \$12,250,881
 - WFP \$8,861,121
 - IOM \$3,389,760
- 2018 budget is 25.7% lower than 2017. Main reasons are:
 - Airlift operation for 2018 reduced from 100 to 30 flights
 - IOM's 2017 plan had budget for x-ray machine for the Turkey cross-border operation. This item is under procurement.
 - All other activities expected to remain the same

Funding

- During 2017, the logistics sector was funded 142.8%
 - Requirement: \$16,498,740
 - Funding: \$23,556,100
 - Some of the extra fund was allocated to cover the air-bridge between Damascus and Qamishli and purchase of 10 trucks to the Syrian Arab Red Crescent
- From the total \$12,250,881 requirement for 2018, 65% of funding expected to be available during Q1
 - IOM confirmed funding \$2 million (61%)
 - WFP expected carry-over to 2018 around 6 million (67%)

Staffing (2017 & 2018)

- Through WFP Contracts
 - Whole of Syria: 2 internationals (based in Damascus)
 - Lebanon: 1 local (IM)
 - Jordan: 2 local
 - Syria: 3 local
 - Turkey: 5 local and 3 international (1 international on roaming profile)
- Through IOM contract
 - Jordan: 3 local and 1 international

Main Challenges

- Insecurity (lack of guarantee for safe passage from the government and various armed groups on the ground)
- Bureaucracy (process of obtaining approval to conduct convoys is quite long and redundant)
- Difficult to operate in the north-east of Syria due to lack of coordination between the Kurdish Self Administration and Government of Syria and necessity to obtain dual approvals.
- Restricted access to facilities
- Not allowed to work with cross-border partners from Iraq in the north-east Syria.
- Restriction on movement of medical supplies to the north-east

Challenges

- Rejection of supplies during inter-agency convoys.
- Possible non-renewal of UNSC resolution for the X-border operation could lead to scaling down of LC activities in Turkey and Jordan.
- Humanitarian organizations, mainly the UN, have been major source of business for transporters. Now, with new areas opening for commercial business (eg phosphate in Homs), commercial movement to the NE Syria, demand expected to be higher than supply. Moreover, if Jordan border is open, local transport market will be stretched.
- Limited access to donors because of security situation in Syria

LOGISTICS CLUSTER

FINANCIAL UPDATE

NOVEMBER 2017

Financial Update

1. Operations funding
2. GLC funding
3. Strategic Goals Planned Expenditure
4. Strategic Goals Budget Sourcing
5. Which parts of the strategy are we looking to fund?

Donations by Year (Top 10)

*Total funding for SOs that include a LC component

Funding by Operation 2017

Funding vs Operational Requirements

92% funded

Funding by Type of Emergency

USA

UN

UK

All Donors

Expenditure 2017 - Strategic Goals

Budget 2018 - Strategic Goals

Sourcing 2017 - Strategic Goals Budget

Sourcing 2018 - Strategic Goals Budget

How does WFP use PSA?

What was the impact of the shortfall?

- Partnerships at the global level
- Advocacy
- Support for training
- Localisation

Which parts of the LC Strategy are we looking to fund?

Preparedness

Funding Requirements 2018
\$ 500,000

- \$500,000 received from OFDA
- Indonesia and Bangladesh roll out
- Ongoing activities
- Continue platform development

Training

Funding Requirements 2018
\$ 587,700

- Continue existing trainings
- New trainings
- In-country training packages

How will we achieve this?

- Engaging more directly with WFP Donor Relations to identify specific donors with an interest in Preparedness and Training
- Engaging with pre-identified Private Sector partners
- Engaging with pre-identified foundations

COFFEE BREAK

Session will re-start at 11:10

Working Groups Update

Preparedness

WG Update

GLM, Leysin November 2017

Content

- 
- Recap - Preparedness
What is it?
 - What are we doing?
 - Discussion

The Goal

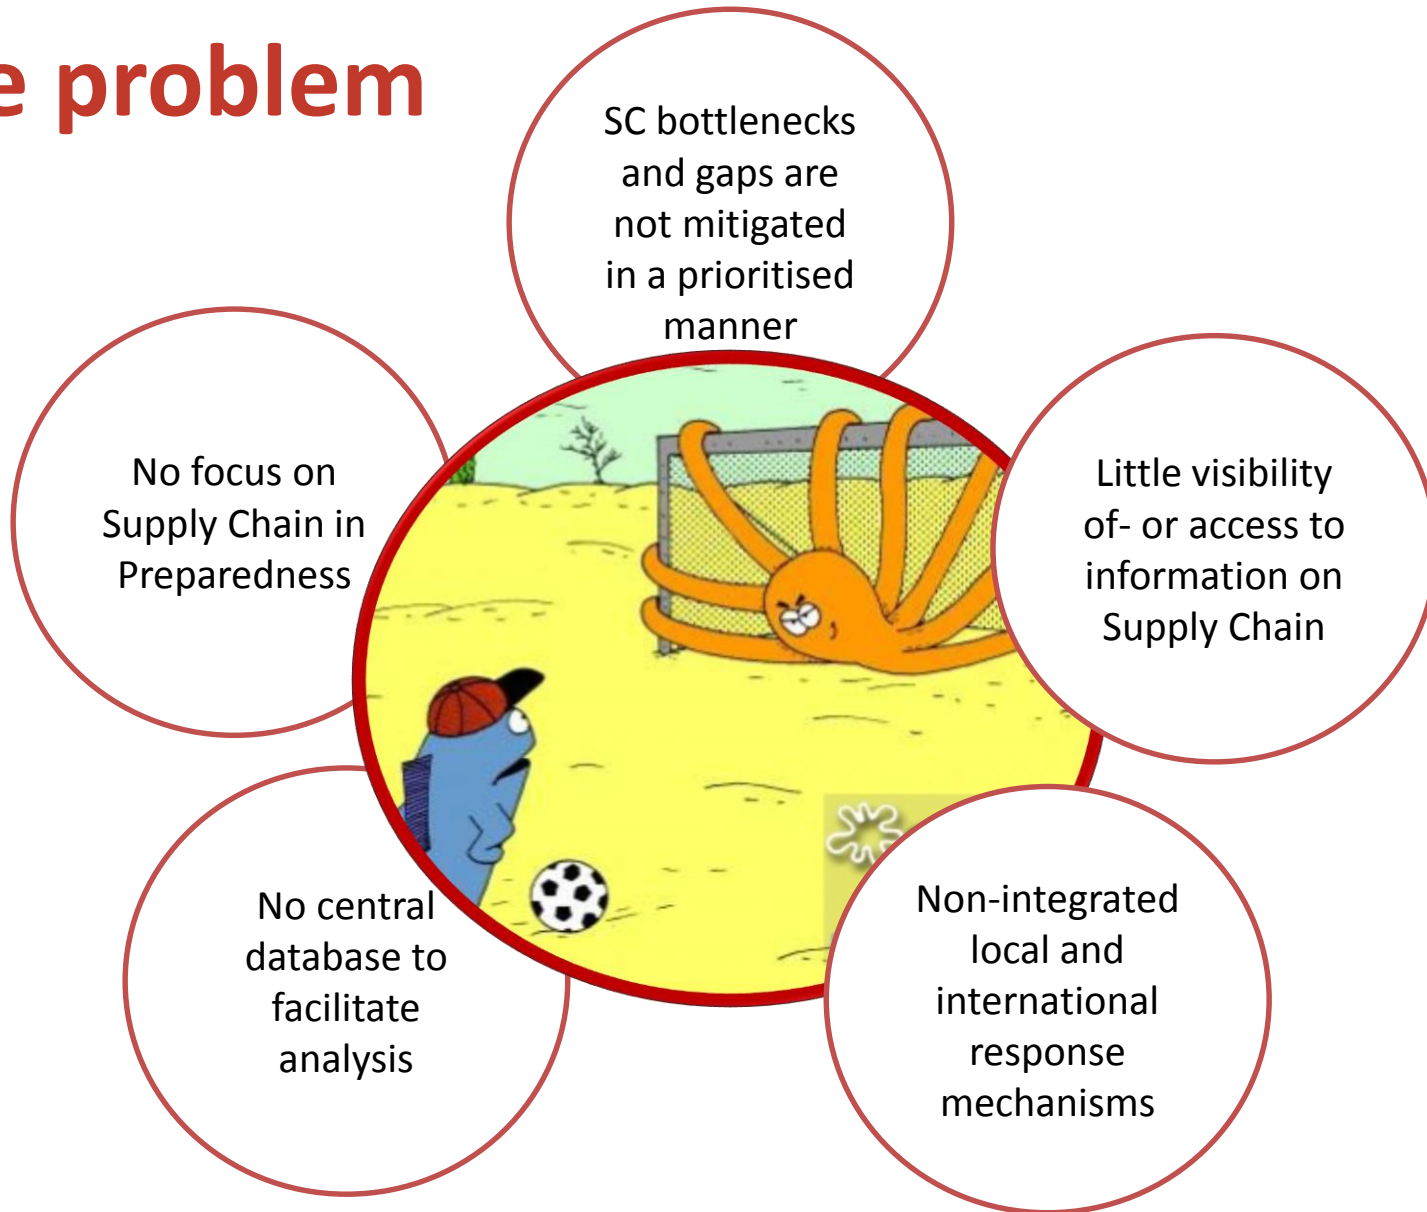

Preparedness goal:

- *Strengthen the immediate response capacity of **national actors** in disaster-prone countries making national actors **well prepared** to respond to emergencies in a coordinated, informed, effective, and efficient manner*

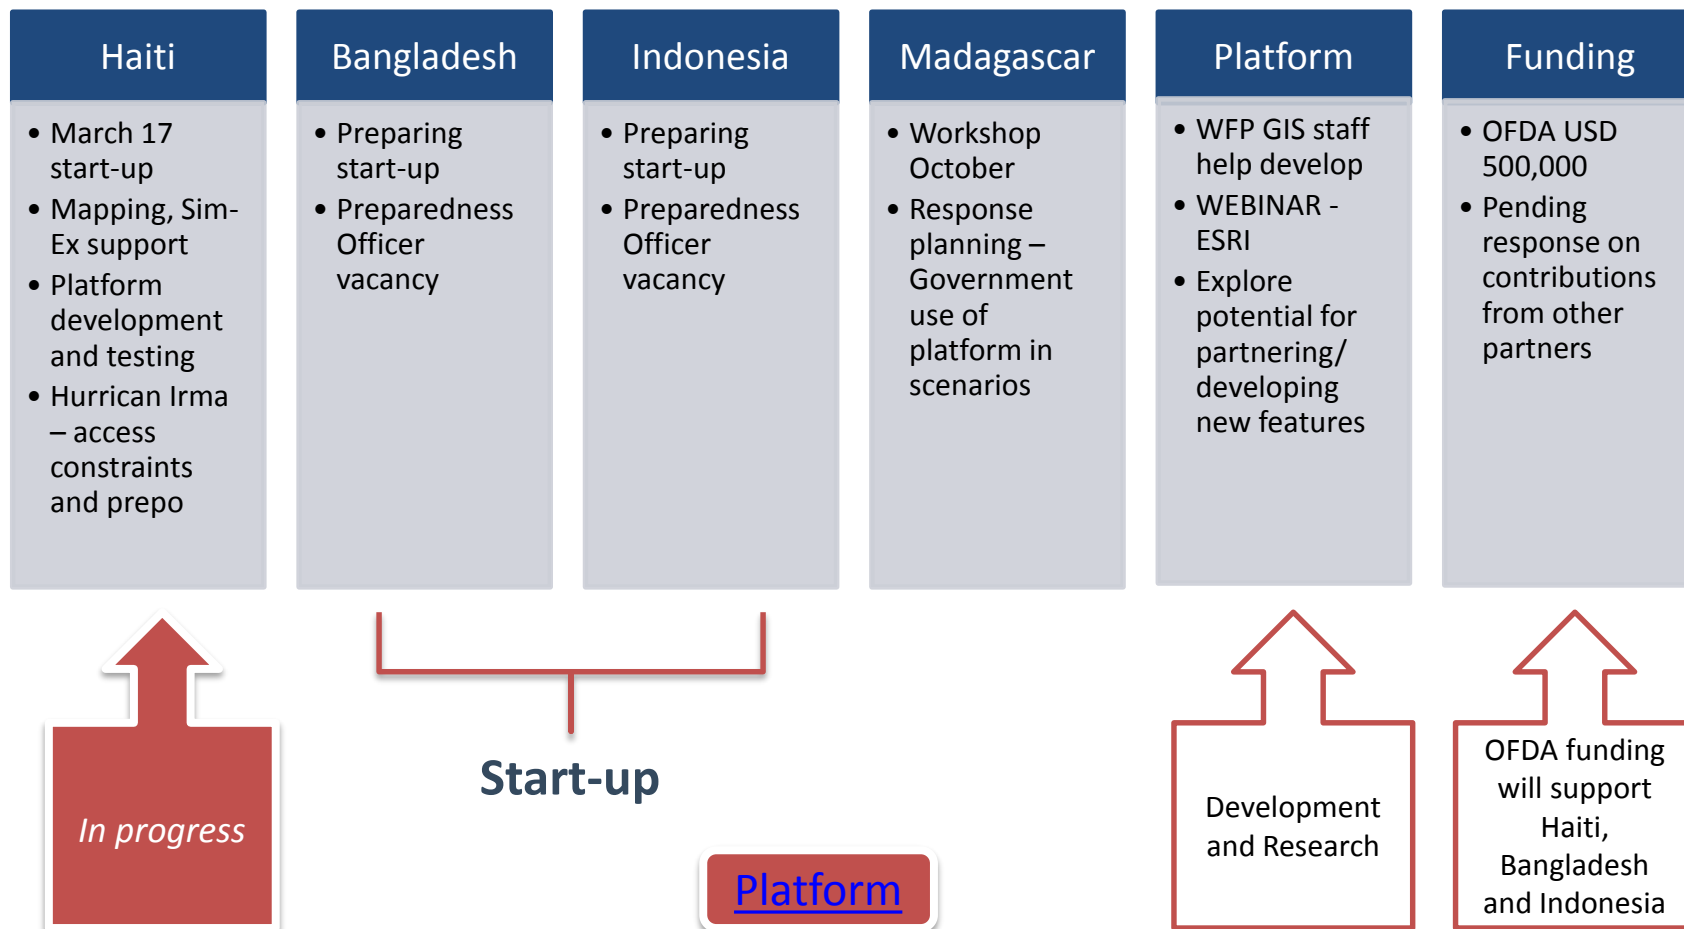

The problem

What are we doing?

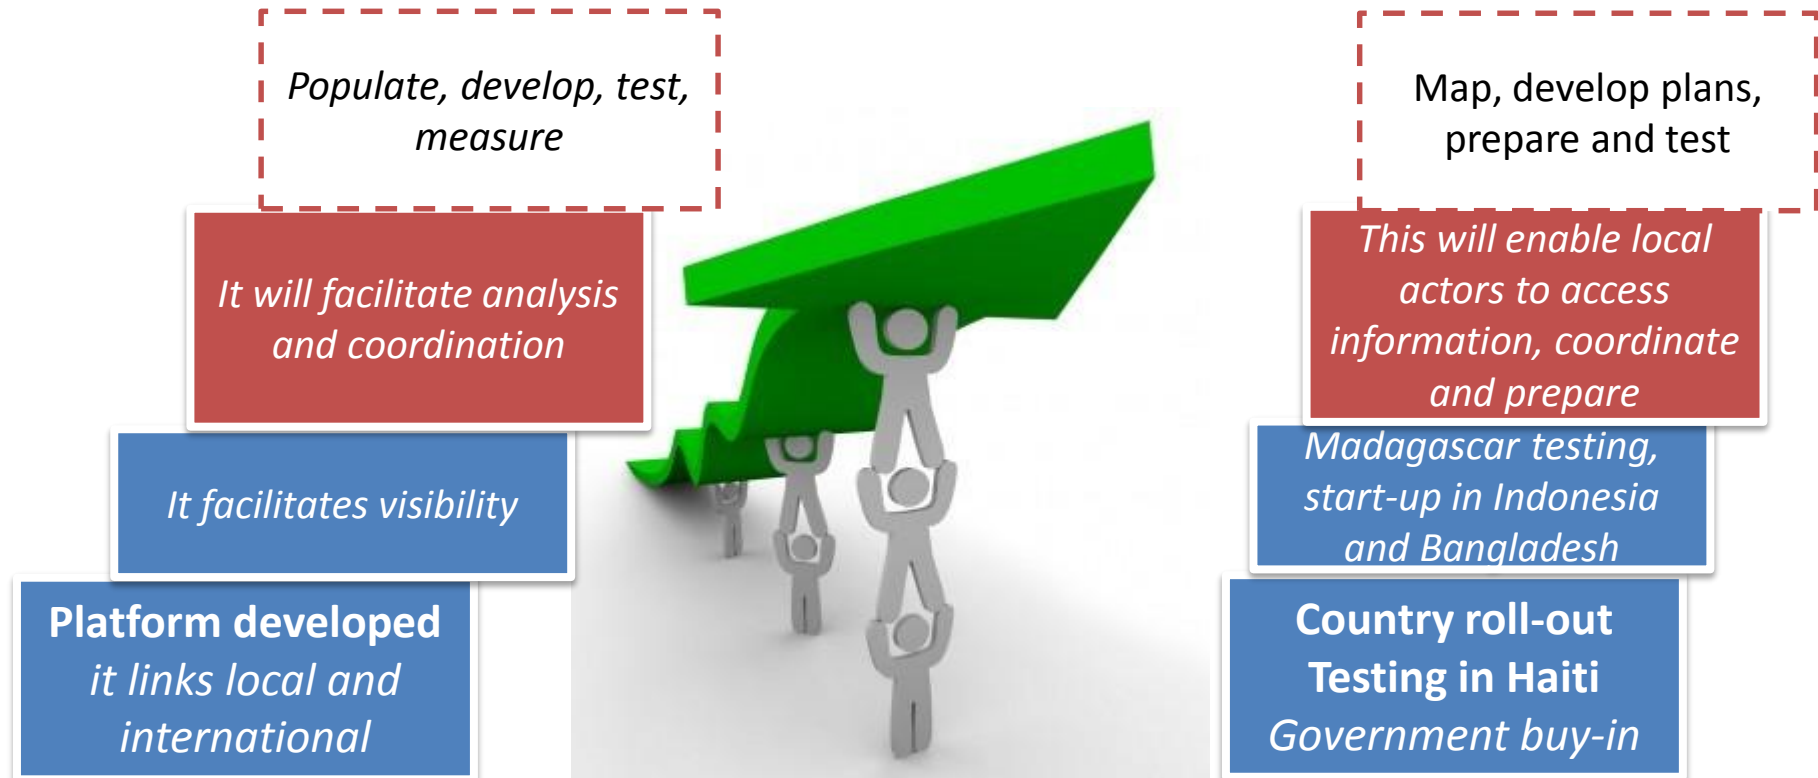

Status

Results

- work in progress and next steps

Indicators & KPI Working group

Action point: Bonn (May 2017): *Working group to look at Logistics Cluster Key Performance Indicators*

Working group: Global Logs Cluster, Mercy Corps, CRS, Oxfam GB, ECHO & BRC

1st meeting October 2017: outcomes:

- Differentiate Indicators from KPIs
- Draft KPIs (the 'what', not the 'how') for:
 - Global Logs Cluster strategy KPIs
 - Operational KPIs
 - Service Provider KPIs
- Plan of Action

Indicators & KPI Working group

Indicators (audience: public, media, communications – to inform)

- No. of trucks loaded
- Tonnage of NFIs shipped

versus

Key Performance Indicators (audience: Logs and operations – to manage)

- % utilisation of trucks' capacity
- % NFIs shipped in full & on time

Indicators & KPI Working group

VISION: Vulnerable communities globally are effectively served in crises by a prepared and locally driven humanitarian system

EFFECTIVE: Satisfaction

PREPARED: Lead time, Human Resources, Services, Assets available

LOCALLY DRIVEN: Increase in local actors

Strategic KPIs

GOAL 1: Strengthen the immediate response capacity of national actors in disaster-prone countries, and identify best capacities for potential humanitarian response.

KPI 1: Degree to which national capacity is strengthened.

KPI 2: % of logistic preparedness capacity gaps that are addressed.

KPI 3: % of action plans that are adopted and implemented at a local level by local organisations.

Indicators & KPI Working group

Strategic KPIs

GOAL 2: Engage with various actors on the global, regional and local levels to understand and address humanitarian logistics requirements.

KPI 4: % of local, regional and national registered partners that participate

KPI 5: % and variety of organisations / stakeholders engaged.

GOAL 3: Operate an effective platform that provides operational coordination, leadership of common logistics services, and logistics information to support the humanitarian community.

KPI 6: Degree to which resource pool (human resources) meets demands of new and on-going emergencies.

KPI 7: % of pre-agreements (assets, service providers) signed with selected countries.

KPI 8: % of operations that implement standards- (i.e. implement up-to-date toolkit, SOPs, MOUs etc.)

Indicators & KPI Working group

Strategic KPIs

GOAL 4: Actively use learning to improve humanitarian logistics operations through learning from experience and sharing best practices within the logistics cluster partners.

KPI 9: % of LLE recommendations adopted and implemented internally and externally

KPI 10: % of best practices adopted and implemented internally and externally

Operational KPIs:

KPIs measuring the activities of the deployed Logs Cluster, many of these are already measured or have systems in place to measure them.

COORDINATION & INFORMATION MANAGEMENT:

KPI 11: % and variety (with focus on local) of organisations actively participating in coordination and information sharing

KPI 12: % of meetings held to schedule

KPI 13: % of organisations that rate satisfactory for coordination and information sharing

KPI 14: % of information gaps identified and addressed within target time

Indicators & KPI Working group

SERVICE PROVIDERS:

KPI 15: 85% of con-ops services requested are fulfilled

KPI 16: 85% of organisations that rate 'satisfactory' for the service provided

KPI 17:

Indicator: Local vs international values of equipment procured, rented or leased

Indicator: Local vs international values of local services contracted

Indicator: Local vs international values of local staff employed

KPI 18: % of expenditure against approved budget

KPI 19: Lead time (against plan) to close down services that are no longer required to meet a humanitarian need.

KPI 20: Lead time (against plan) to open services given funding, security and con-ops approval.

Indicators & KPI Working group

Plan of Action:

- Write up (with reasoning) proposed KPIs and indicators
- Circulate draft to other members of the KPI Working Group for feedback
- Finalise KPIs
- Present and gather comments at Global Logs cluster meeting November 2017 (tbc subject to agenda)
- Create resource plan for implementation of KPIs detailing one-off investments (e.g. tools, systems) and recurring and maintenance costs
- Amendments to, and approval of resource plan by Global Logistics Cluster Coordinator (GLCC) and Strategic Advisory Group (SAG)
- Implement & maintain KPIs, and termination of working group

Lessons Learned

WG Update

GLM, Leysin November 2017

Content

- 
- WG objective, participants, role
 - WG activities 2017
 - LL Methodology and process
 - Learning from lessons
 - Services implemented by partners
 - LL Ethiopia and Haiti
 - WG activities 2018
 - Planning call January 16 or 23
 - Studies planned
 - Discussion

Work Group Objective

***Pillar 4: Improve
through learning
and sharing of
best practices***

Role of the Work Group

A sparring partner group

A strategy consultation group

An operational support group

Review and discuss
GAPS -
methodology and
process

Provide strategic
guidance

Provide support
with specific
studies or activities

Activities 2017

Lessons Learned

- Yemen LL
- Iraq LL

In progress:

- Haiti LL
- Ethiopia LL
- Services implemented by partners

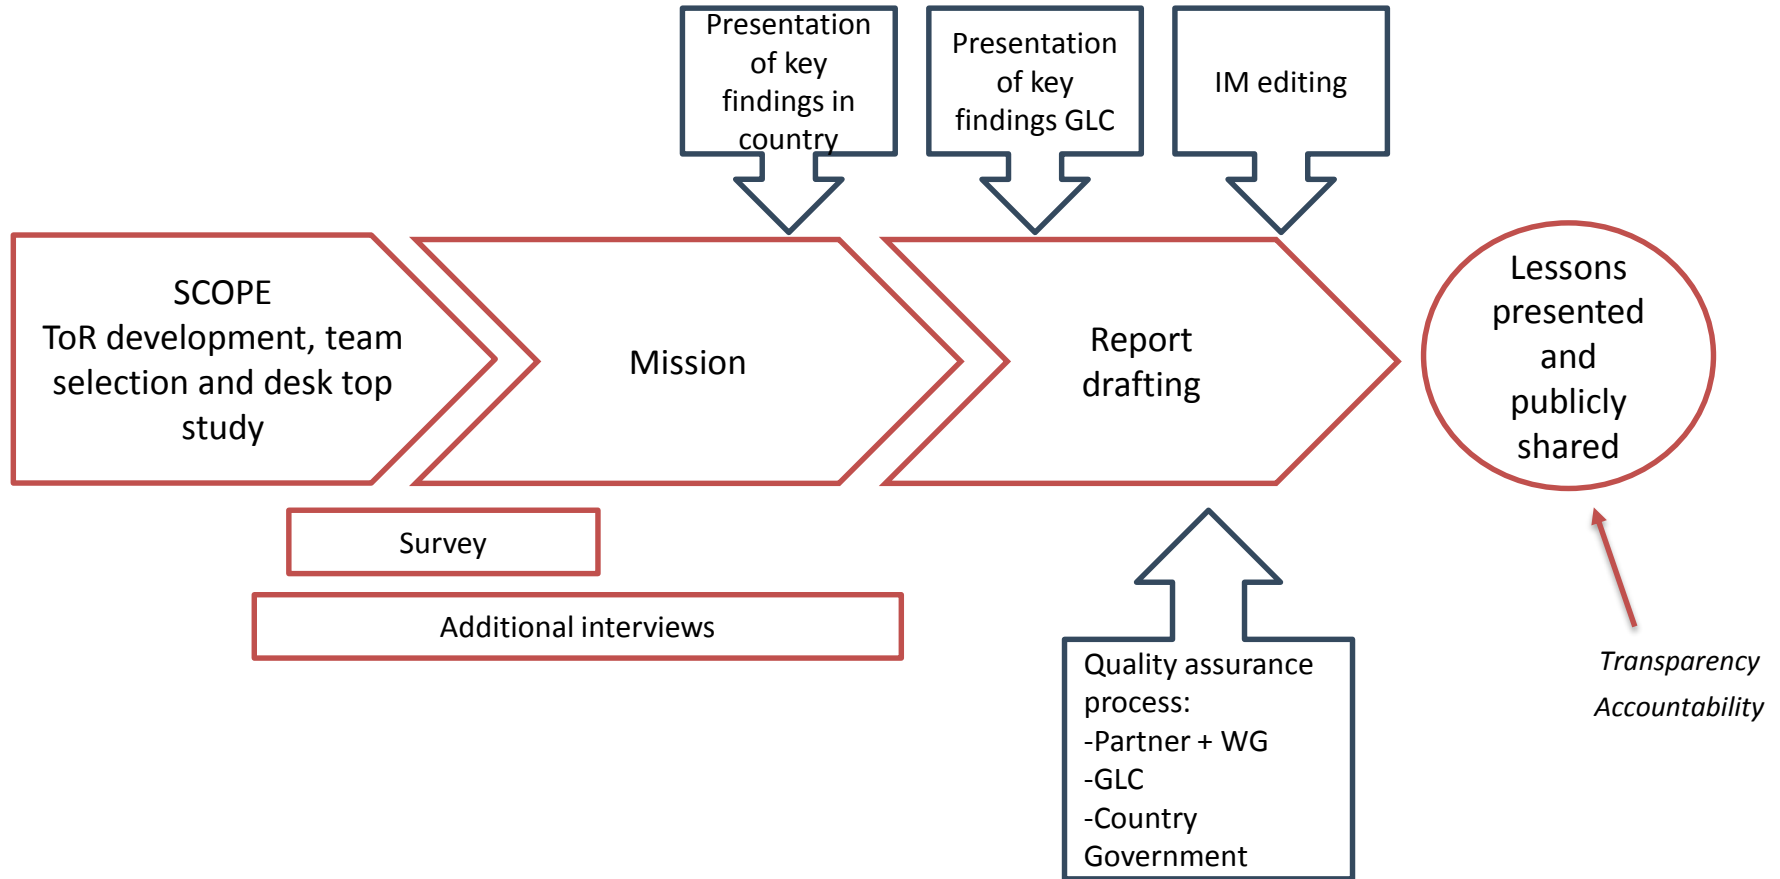

Methodology

- WG - Clarification of methodology and process

Learning from Lessons

- Lessons learned tracking and follow-up method established

Lessons Learned Study Process

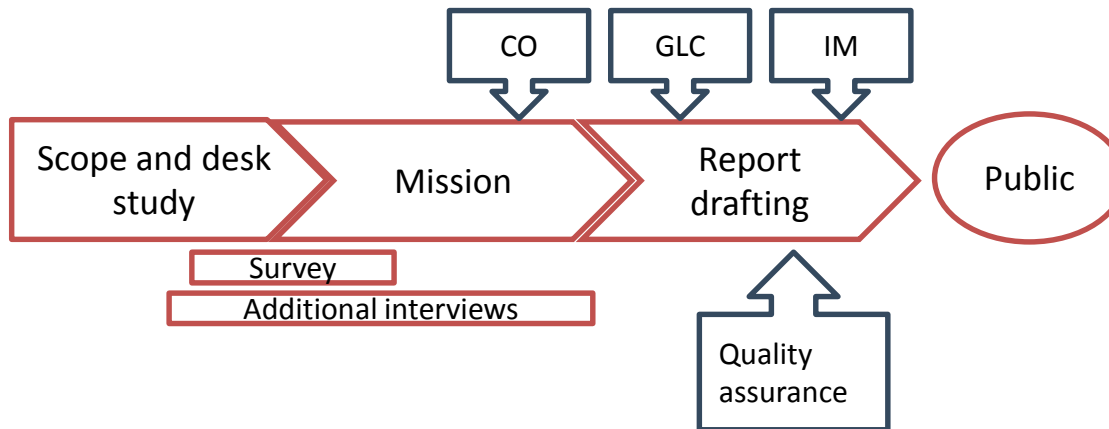

Lessons and best practices are then giving 'an owner', deadline, and progress monitored in a table at GLC level

GAPS

1. *Time – process takes too long*
2. *Length – the report is too comprehensive*
3. *Relevance – what and how are we learning?*

- Not focused enough
- Desk study not done prior to mission

- KPIs missing

- Dedicated writer needed

- Dedicated LL enforcer 😊

Learning from Lessons

12 Lessons learned since Dec 2012

1. CAR
2. DRC
3. Ethiopia (in progress)
4. Haiti (in progress)
5. Iraq
6. Nepal
7. Mozambique
8. Somalia
9. Syria
10. Ukraine
11. Yemen (twice)

Lessons character

107 lessons/recommendations
registered (excluding Ethiopia and
Haiti)

Strategy area:

- Preparedness (4)
- Network/engage (24)
- Operations (70)
- Learning (9)

Activity area:

- Coordination (36)
- IM (17)
- Logistics Services (23)
- GLC (31)

Actions taken - Examples

Examples of learning 1

Issue: Slow set-up of logistics assets, not appropriate set up for humanitarian response, WFP provider mindset

Reputed lesson: Improve use of existing (relevant) logistics assets available

Action:

- Map existing assets (preparedness)
- Make agreements in advance
- Understand barriers to use of partner assets
- Mindset change

14 different organisations implement services

Examples of learning 2

Issue: Non- or not right level of participation in cluster coordination/meetings leading to ineffective coordination (irrelevant strategy)

Reputed lesson: Engage partners to improve coordination and right level of participation

Action:

- Cluster induction training
- Bilateral engagement of senior level staff
- Coordinator profile (TOR) and training
- Skype forums in operations

Haiti LL commending participation

Examples of learning 3

Issue: Support from GLC to country operation, deployment of staff, high staff turnover, periods of gap, staff without required qualifications

Reputed lesson: Develop staff strategy and GLC-Country operation guidance

Action:

- Cluster coordinator training
- Cluster induction training
- Staff profile
- Roster development
- No regrets deployment
- Management engagement

Haiti LL commending deployment, staff skills

Ethiopia – Key findings

Comprehensive
Gaps Analysis

High focus on
capacity
development

High level support
and cooperation

National/federal
level focus vs last
mile

Government staff
recruitment through
outsourcing

Haiti – Key findings

Successful operation due to:

- Preparatory work locally (Government and WFP working relationship, access to relevant logistics assets)
- And globally (deployment of qualified staff; support arrangements with partners)

Future:

- Preparedness (understanding the logistics bottlenecks and possible gaps, how to best respond to them)
- Identifying and engaging local actors prior to an emergency facilitating their part in a response
- Training of national actors and local staff
- Training of humanitarian responders
- Upstream supply coordination – how to?

Activities 2018

- 1) *Planning call 16 or 23 January*
- 2) *Studies planned:*
 - *South Sudan Lessons Learned*
 - *Services implemented by partners*
 - *Impact studies*
 - *Thematic studies?*
 - *Private sector partners part of lessons learned?*

*We would like to invite
you to join the WG!*

Logistics Cluster

Operational Capacity Development Concept

The background of the slide is a red-tinted photograph of a group of people at a meeting. In the foreground, two individuals are seen from behind. The person on the left is wearing a white t-shirt with a logo that includes the text 'ACF' and 'Logistics Cluster'. The person on the right is wearing a dark vest over a white shirt, with a large 'ACF' logo on the back. Other people are visible in the background, some looking at a presentation screen. The overall scene suggests a professional gathering related to logistics or humanitarian aid.

**Global Meeting
Switzerland 2017**

Objectives

- Need for standardized approach
- Common language and understanding
- Minimize duplication of work
- Make response faster and more efficient
- Promote inclusiveness and interoperability
- Make the private sector part of the system!

SAVE LIVES FASTER and more **EFFICIENT**
